PHILIPPIANS 4:12-14

I know what it is to be in need,
and I know what it is to have
plenty. I have learned the
secret of being content in any
and every situation, whether
well fed or hungry, whether
living in plenty or in want. I
can do all this through him
who gives me strength.

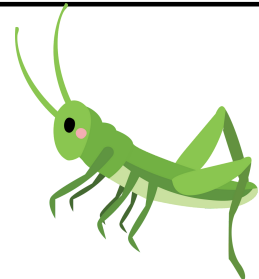

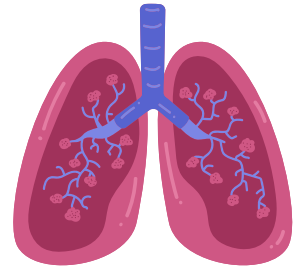

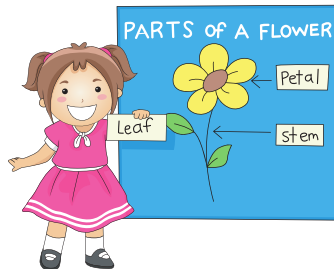

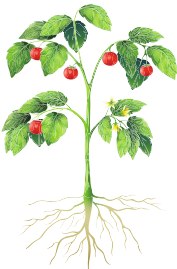

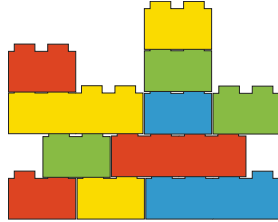

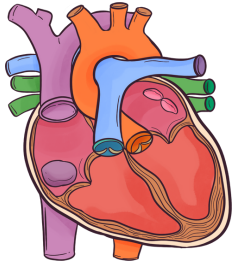

Yet it was good of you to
share in my troubles.

Reconstruction

Name: _____

During Radical Reconstruction, lawmakers put the South under military rule and removed most white Southern leaders from power.

This left control of the Southern states in the hands of African Americans and whites loyal to the Union. Some of these whites were criticized by Southerners, who called them carpetbaggers.

During Radical Reconstruction, lawmakers put the South under military _____ and removed most white Southern leaders from power.

This left control of the Southern states in the hands of African Americans and whites loyal to the _____. Some of these whites were criticized by Southerners, who called them carpetbaggers.

Reconstruction

Name: _____

Andrew Johnson

The term referred to the idea that they were Northerners who came to the South carrying only what they could put in a small bag.

Southerners also accused them of coming to take advantage of the situation. Some white Southerners cooperated with the Blacks and carpetbaggers. Other Southerners accused those who cooperated of doing so in order to further their own interests. They called them scalawags.

WHAT IS A CELL?

Cells are the basic structures of all living organisms.

Cells provide structure for the body, take in nutrients from food and carry out important functions.

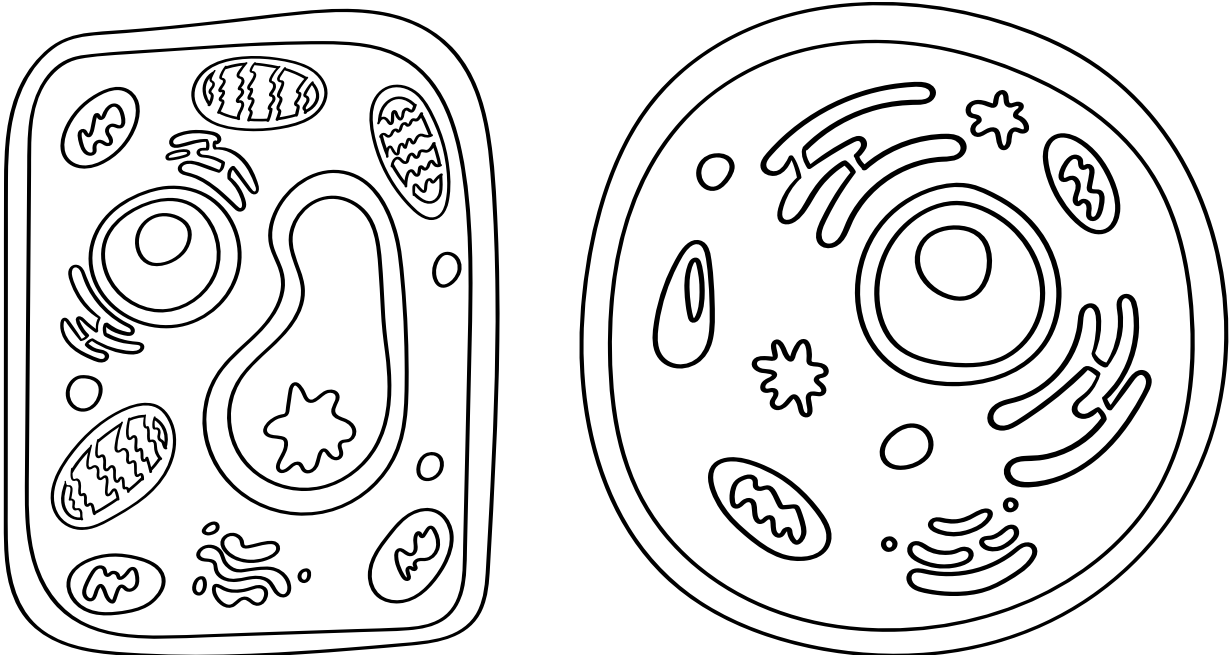

Cells group together to form tissues, which in turn group together to form organs, such as the heart and brain.

Our cells contain a number of functional structures called organelles.

These organelles carry out tasks such as making proteins, processing chemicals and generating energy for the cell.

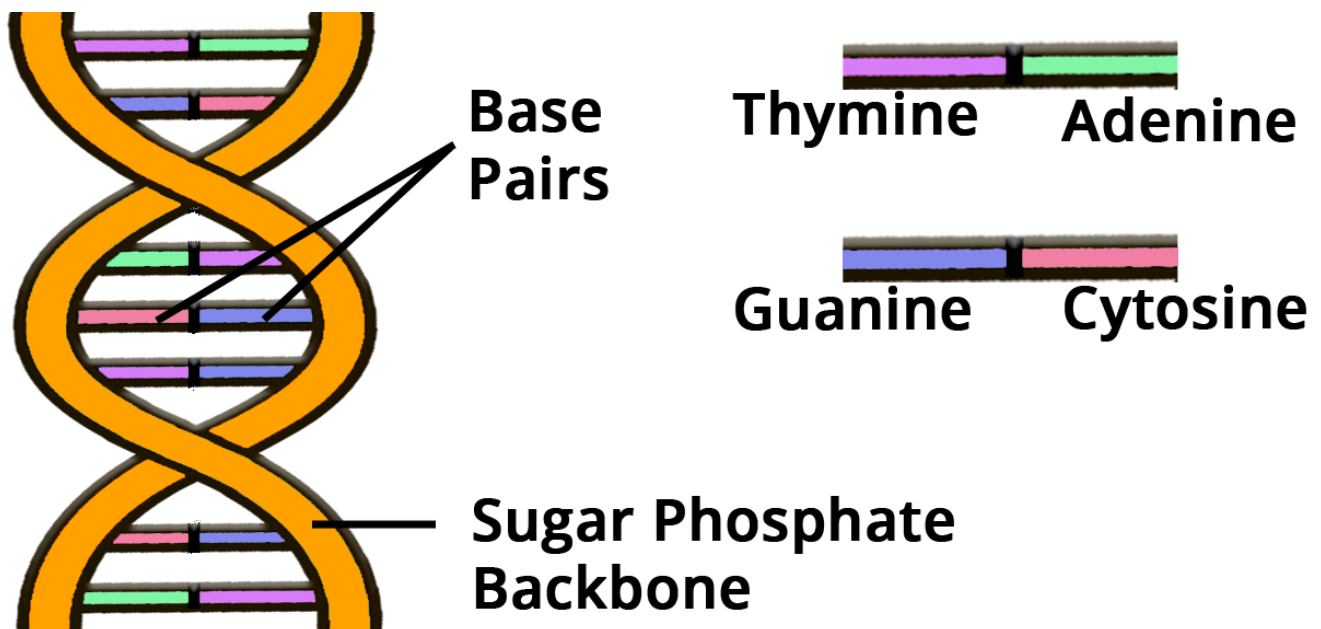

The nucleus? is based at the centre of the cell and is the 'control room' for the cell.

The genome is an organism's complete set of genetic instructions and is found within the nucleus.

What is DNA?

DNA is the genetic information inside the body's cells that helps make people who they are. It's the instructions for how to make the body, like the code to a video game or blueprints for a house. If you used a very strong microscope, you would see that DNA looks like a twisting ladder.
