

Name: _____

Abeka Science Grade 4 - Page -01-104 Questions

1. Magnetism - the attracting and repelling force created by a magnetic field
2. Polarity - having two opposite sides that work differently
3. Electromagnet - a device that generates electromagnetic force
4. A magnet is strongest at its poles and weakest at its center
5. Friction is a type of electromagnetic force.
6. Static electricity can both attract and repel, it is also called an electromagnetic force.
7. A coiled wire generates a stronger magnetic force than a straight wire does.
8. The Earth has a North magnetic pole and a South magnetic pole.

1. Magnetism - the attracting and repelling _____ created by a magnetic _____
2. Polarity - having ____ opposite sides that work differently
3. Electromagnet - a _____ that generates electromagnetic _____
4. A magnet is _____ at its poles and weakest at its _____
5. _____ is a type of electromagnetic force.
6. Static electricity can both attract and _____, it is also called an electromagnetic force.
7. A _____ wire generates a stronger magnetic force than a _____ wire does.
8. The Earth has a _____ magnetic pole and a _____ magnetic pole.
